

## CRC

### Standard

#### Front

Magenta - 36-40 shore "soft purples". High grip, long life. Part of the pink/purple family of rubber. Great for 1/12th modified or asphalt.

Black - Long wear, high grip exotic racing rubber.

Red - Med-Firm 40 shore. Exotic, super long wear, med. grip, high rubber content racing foam. For front **tires** on asphalt. Not for carpet.

Purple - Firm 45 shore. Exotic, long wear, high grip, high rubber content racing foam.

#### Dual Compound

Magenta/Orange - Med. 35 - 39 shore. Exotic, long wear, high grip, high rubber content racing foam.

Purple/Orange - Firm 45 shore. Exotic, long wear, high grip, high rubber content racing foam.

#### Rear

White - Med. wear, high grip exotic racing rubber.

Green -30 shore Good old American foam rubber. Less expensive, good grip on carpet, but more wear than the pink/magenta family and more wear than the white/grey family.

Pink - 30-33 shore. High grip, long wear. The traction leader for rear grip. Great for asphalt.

Wears like iron with great grip.

Grey - Long wear, high grip exotic racing rubber.

Magenta - 34 - 38 shore. High grip, long wear. Same family as pink, but firmer. Great for asphalt and carpet. Wears like iron with great grip.

### Pro Cut - Larger diameter

#### Front

Grey - Softer than black compound for more steering, gets less sticky than Magenta or Purple.

Black - Firm shore, long-wear, high grip, less rubber content, less tacky on high bite tracks.

Purple - Firm shore, long-wear, high grip, high rubber content.

Magenta - Medium shore, long-wear, high grip, high rubber content.

#### Rear

White - Soft shore, long-wear, high grip, less rubber content, less tacky on high grip. White compound is very soft and will chunk when trued very small

Grey - Medium shore, long-wear, high grip, less rubber content, less tacky on high grip tracks.

Pink - Soft shore, long-wear, high grip, high rubber content.

Magenta - Medium shore, long-wear, high grip, high rubber content.
